Gabriel Paiva

WEB INFORMATION SYSTEMS
AND TECHNOLOGIES STUDENT

+351 926 945 169 | mr.sousapaiva@gmail.com | github.com/Gabriel-S-Paiva | linkedin.com/in/gabriel-s-paiva

Summary

High-achieving Web Information Systems and Technologies student at ESMAD/IPP with a strong focus on backend systems, REST APIs, and modern web software. Winner of 4 coding competitions and hackathons with hands-on experience building self-hosted applications and dual-database web APIs.

Technical skills

- **Languages:** JavaScript (ES6+), TypeScript, Go, Python, SQL (MySQL), HTML5, CSS3, PHP
- **Backend & Systems:** Go, Node.js, Express, REST APIs, MySQL (Sequelize), MongoDB (Mongoose), SQLite, JWT, Server-Side Sessions
- **Frontend & Design:** SvelteKit 5, Vue.js (Pinia), Three.js / Rapier.js, Tailwind CSS, Bootstrap, Figma (UI/UX prototyping)
- **DevOps & Testing:** Docker, Docker Compose, Caddy, GitHub Actions (CI/CD), go test, JMeter, Vitest, Selenium, Git, Linux
- **Also familiar with:** Python (pandas, NumPy, scikit-learn), Arduino, MinIO

Projects

Owned Cloud | Creator & Developer (Go, SQLite, SvelteKit 5, Docker, Caddy)

- Built a self-hosted cloud storage system in Go and SvelteKit 5 with session-based authentication (bcrypt, HttpOnly cookies), storage quotas enforced via transactional reservation, and View/Edit folder sharing.
- Designed a single-origin Caddy reverse-proxy architecture so HttpOnly sessions work, and built a chunked two-phase file upload pipeline.
- Implemented a sliding-window rate-limiting middleware, and covered the storage layer with automated tests (67% coverage).
- Set up GitHub Actions CI/CD (golangci-lint, govulncheck, go test, Vitest) with a self-hosted runner deploying to a home server via Docker Compose.

Project SAM – Municipal Platform | Backend Developer (Node.js, Express, MySQL, MongoDB)

- 1st Place - Best WebPII Project Award (2025/26), team of 3.
- Built the REST API backend (MVC architecture, CRUD endpoints) for a municipal support platform.
- Designed a dual-database architecture using MySQL for domain entities and MongoDB for high-frequency logs and smart locker telemetry.
- Implemented JWT authentication with access/refresh tokens and role-based access control (RBAC).
- Ran performance testing of the API with JMeter.

Honors & awards

- **1st Place - TeamGreen4All Hackathon** (IPP-Wide Competition, May 2026)
- **1st Place - Best WebPII Project Award** (2025/26)
- **1st Place - 3.ª Edição Concurso de Programação madJS** (May 2025)
- **1st Place - ESMAD Best Project Award** (2024/25)
- **Invited Speaker - ESMAD Seminar: "Sucesso Académico em Contexto de Grupos de Trabalho" (Academic Success in Group Work Contexts)** (Mar 2026)

Education

- **B.Sc. in Web Information Systems & Technologies** | ESMAD / Politécnico do Porto (2024 - Present) - Current Grade 18.08/20
- **Curso Avançado em Desenho e Programação Web** | MasterD (2023 - 2025) - Grade: 20/20 (98%)
- **Curso Profissional de Instrumentista** | Músico de Sopro e Percussão (2020 - 2023)
